

Gripbox[®]

Electric Vehicle Charger Retention Sockets

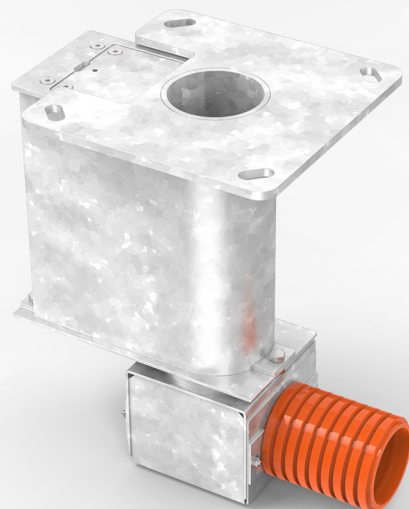

Gripbox is the ideal solution for securely retaining electric vehicle charger mounting plates. It is lockable and utilises an advanced mechanism which produces a strong and reliable grip.

Gripbox offers many advantages such as an easy to operate ground level actuation system, a superior gripping force and improved security. A range of ducting options covers many cabling situations.

Removable plate for attaching EV charge point.

As well as manufacturing the retention sockets, custom mounting plates for your charging unit can be designed and made in our UK factory.
