

# Gripbox<sup>®</sup> EV Retention Sockets

The new generation of pole retention

Gripbox is the ideal solution for securely retaining electric vehicle charging units. The robust, precision-engineered grip delivers exceptional holding power, ensuring your installations stay safe and secure.

With easy-to-use ground-level actuation, Gripbox combines effortless operation with advanced security, providing unmatched protection for your valuable assets.

Adaptor plates are manufactured in our factory to compliment specific charging unit requirements.

168mm diameter Gripbox allows through feeding of 110mm duct.
