

Gripbox[®] Ductbox

The new generation of pole retention

Ductbox adaptors are integral to the design of Gripbox and allow many possible options to suit all site requirements.

A standard Gripbox combined with a Ductbox offers many variations for cable ducting. In addition, the box is easily configured on-site, offering single or dual duct entry points that are securely attached.

The box height is variable with a range of adaptors which are easily fitted. The Ductbox can swivel through a full 360 degrees allowing the easy alignment of ducting.

Extensions are available without a Ductbox where cable ducting is not required. These allow for deeper pole embedded depths.

UK Patent GB2579831
US Patent 11459785
Gripbox is a registered trademark.
Gripbox is designed and manufactured in the UK by Simbars (UK) Limited.
