

# Gripbox<sup>®</sup> Retention Sockets

The new generation of pole retention

Gripbox is a fabricated steel enclosure incorporating a unique patented grip mechanism developed to retain highway poles and electric vehicle charging foundations.

Tightening a single ground level actuation socket results in a powerful, controlled grip. The large grip surface area eliminates the possibility of pole damage and ensures the correct clamp force is applied at every installation.

Security is a built in feature with operation only possible with the use of the correct actuation socket.

UK Patent GB2579831  
US Patent 11459785  
Gripbox is a registered  
trademark.  
Gripbox is designed and  
manufactured in the UK  
by Simbars (UK) Limited.
